

FOR IMMEDIATE RELEASE: November 01, 2009

MacKintok Spotlited in Major Machine Tool Publication

MacKintok Information Architects & Designers, a Syracuse, New York software company that designs web based applications for machine tools and manufacturing is being spotlighted in the November 2009 issue of Modern Machine Shop. Modern Machine Shop is one of the top periodicals in the machine tool and manufacturing industry and this issue is featuring software that machine tool and manufacturing companies can benefit from and use to improve their process.

Modern Machine Shop is focused on all aspects of metalworking technology - providing the new product technologies; process solutions; supplier listings, software packages, etc. Modern Machine Shop also has an on-line version at www.MMSonline.com. The MacKintok article can be viewed on-line at the Modern Machine Shop web site.

In the article Ken Tock, Founder and President of MacKintok, describes the software applications (Component Information Display (CID) Modules) the company designs and how their clients benefit from them. Mr. Tock also talks about MacKintok's involvement with MTConnect. MacKintok is a member of the Technical Advisory Group or TAG and is active in helping to define the MTConnect standards. MacKintok is a member of a number of MTConnect Working Groups such as: Machine Tool, Standard, and Notification. MacKintok is looking to work with other companies to implement MTConnect products.
